

Public sector websites or apps accessibility legislation

Information

Article Number 000003001

Author Asimina Stamatiou

Issue

Issue New regulations came into force for public sector bodies on 23 September 2018. They say that public sector bodies must make their websites or mobile apps more accessible by meeting the international WCAG 2.1 AA accessibility standard (unless this change causes a 'disproportionate burden').

The deadline for meeting the standard is:

- For new websites (published on or after 23 September 2018): 23 September 2019
- For existing websites: 23 September 2020
- For apps: 23 June 2021

Please see more details [here](#).

MHR will ensure that the web recruitment module which forms part of an organisation's website will meet the WCAG 2.1 AA accessibility standard by 10.33.00 release which is targeted for end of August 2019.
